

CARDIAC RHYTHM MANAGEMENT SYSTEM WITH EXERCISE TEST INTERFACE

ABSTRACT

5 This document discusses, among other things, cardiac rhythm management
systems, devices, and methods providing an exercise test interface. A patient
exercise episode is identified using at least one predetermined criteria. Data
associated with the episode is obtained. A summary of the episode is displayed for
a user. The displayed summary includes at least one prognostic indicator obtained
10 from the data associated with the episode. Examples of prognostic indicators
include, among other things, ectopic beats, runs of ectopic beats, rate of decrease of
heart rate during a post-exercise recovery portion of the episode, a maximum
attained heart rate for comparison to a maximum age-predicted heart rate, as well as
other prognostic indicators.
